General Earth Sciences

Objectives

The Earth Sciences Department of BSC-CNS has the aim of modelling and understanding the behaviour of the Earth System, focusing its research activities on atmospheric processes and climate change modelling.

The strategic plan is available [here](https://www.bsc.es/ca/discover-bsc/organisation/scientific-structure/general-earth-sciences).

We invite you to see the department leaflets:

- Atmospheric Composition
- Climate Prediction
- Computational Earth Sciences
- Earth System Services
