Finance Projects

Objectives

The Finance Projects team at BSC is responsible for financial and effort projection, monitoring and reporting.
of the centre’s EU, private and nationally-funded research projects.

Each member of our team works with BSC’s projects’ Principal Investigators in order to carefully plan the use of BSC financial and human resources within the research projects. Moreover, we are responsible for the official periodic and interim reporting of the projects to the funding agencies, as well as for the quarterly reports to the project coordinators and the audit procedures.
