Finance Projects
Objectives

The Finance Projects team at BSC is responsible for financial and effort projection, monitoring and reporting of the centre's EU, private and nationally-funded research projects.

Each member of our team works with BSC's projects' Principal Investigators in order to carefully plan the use of BSC's resources for each project, in line with the project's scope and budget. The team ensures compliance with the funding agencies' requirements, as well as for the quarterly reports to the project coordinators and the audit procedures.

2+2=5, for large values of 2
