

BSC Training Course: Programming of Petaflop Machine: MareNostrum5

Objectives

Objectives: The objective of this course is to present to potential users the new configuration of MareNostrum and a introduction on how to use the new system (batch system, compilers, hardware, MPI, etc). Also It will provide an introduction about RES infrastructures and how to get access to the supercomputing resources available.

Requirements

Prerequisites: Any potential user of a HPC infrastructure will be welcome

Speakers

Convener: David Vicente, User Support Manager, Operations, BSC

Lecturers: David Vicente, Javier Bartolomé, Jorge Rodríguez, Carlos Tripiana, Oscar Hernandez, Félix Ramos, Cristian Morales, Francisco González, Ricard Zarco, Pablo Ródenas, Gaurav Saxena y Maicon Faria.

Learning Outcomes

The students who finish this course will know the internal architecture of the new MareNostrum, how it works, the ways to get access to this infrastructure and also some information about optimization techniques for its architecture.
