

iPATC: HPC-based simulations for the Industrial Realm

Requirements

PLEASE BRING YOUR OWN LAPTOP.

All PATC Courses at BSC do not charge fees.

Registration for this course is now open. Please follow the link below to register.

Outline:

The course is organized as a series of talks describing several industrial projects we are carrying on at the CASE department of BSC. All these projects have a common point: very complex simulations of physical systems lie at the core, requiring HPC-based software. The CASE department develops Alya, a multi-physics parallel simulation code capable of running on thousands of processors. Among the application fields are:

- Oil and Energy,
- Environment,
- Aerospace and
- Pharmaceutical Industry.

Lecturers:

Mariano Vázquez (High Performance Computational Mechanics Group Manager)

Guillaume Houzeaux (Physical And Numerical Modelling Group Manager)

Herbert Owen (CASE Senior Researcher)

Fernando Cucchietti (CASE Senior Researcher)

Josep de la Puente (CASE Senior Researcher)

Mauricio Hanzich (CASE Senior Researcher)

For further details on CASE research, [please visit our webpages.](#)

Recommended Accommodation:

Please follow [the link](#) for map of some local hotels.

Contact Us:
