

## [ONLINE] PATC: Introduction to Simulation Environments for Life Sciences

### Objectives

The course will make the attendants familiar with simulation technologies used in Life Sciences and their specific adaptation to HPC environment

**Detailed outline:**

Introduction to biomolecular simulation

Coarse-grained and atomistic simulation strategies

Automated setup for simulation

**HPC specifics:** Large scale parallelization, use of GPU's

Storage and strategies for large scale trajectory analysis

**Learning Outcomes:** Setup, execute, and analyze standard simulations in HPC environment

### Requirements

**Prerequisites:** Basic knowledge of structural bioinformatics Basic knowledge of parallelization strategies. Material will be provided during the course, students are welcome to provide their own use cases.

Please download and carefully read the following [instructions](#) regarding the logistics participants enrolling online PATC at BSC are expected to follow.
