PATC Course: Big Data Analytics

Objectives

The course brings together key information technologies used in manipulating, storing, and analysing data including:

- the basic tools for statistical analysis,
- techniques for parallel processing,
- tools for access to unstructured data,
- storage solutions.

Learning Outcomes: Students will be introduced to systems that can accept, store, and analyse large volumes of unstructured data. The learned skills can be used in data intensive application areas.

NOTICE: From 14th of January all aplicants will be put on waiting list and places cannot be confirmed. If any places become available, we will inform you on a first come - first served basis.

All PATC Courses at BSC do not charge fees.
PLEASE BRING YOUR OWN LAPTOP.

Course Convener:

Maria-Ribera Sancho
