PATC: HPC-based simulations, Engineering and Environment with applications in Bioengineering

Objectives

The objective of this course is to give a panorama on the use of hpc-based computational mechanics in Engineering and Environment through the projects BSC are carrying on. This panorama includes the basics of what is behind the main tools: computational mechanics and parallelization. The training is delivered in collaboration with the center of excellence CompBioMed.

A number of fixed amount travel grants will be offered to a selected number of participants for covering part of their travelling expenses. More information will be published soon

Requirements

Level: All courses are designed for specialists with at least 1st cycle degree or similar background experience

All PATC Courses at BSC do not charge fees.

Academic Staff

Course Convener: Mariano Vazquez
