Objectives

Objectives: The objective of this course is to present to potential users the new configuration of MareNostrum and an introduction on how to use the new system (batch system, compilers, hardware, MPI, etc). Also, it will provide an introduction about RES and PRACE infrastructures and how to get access to the supercomputing resources available.

Requirements

Prerequisites: Any potential user of a HPC infrastructure will be welcome

Learning Outcomes

Learning Outcomes: The students who finish this course will know the internal architecture of the new MareNostrum, how it works, the ways to get access to this infrastructure and also some information about optimization techniques for its architecture.

Academic Staff

Course Convener: David Vicente
