Job title: HPC GPU Engineer (RE2)

About BSC

The Barcelona Supercomputing Center - Centro Nacional de Supercomputación (BSC-CNS) is the leading supercomputing center in Spain. It houses MareNostrum, one of the most powerful supercomputers in Europe, and is a hosting member of the PRACE European distributed supercomputing infrastructure. The mission of BSC is to research, develop and manage information technologies in order to facilitate scientific progress. BSC combines HPC service provision and R&D into both computer and computational science (life, earth and engineering sciences) under one roof, and currently has over 770 staff from 55 countries.

Context And Mission

The Earth Sciences Department, led by Prof Francisco Doblas-Reyes, aims to deliver novel, advanced, and well-evaluated high-resolution global climate models capable of simulating and predicting climate estimations with unprecedented reliability. The ideal candidate will be part of the High Performance Computing for Earth Sciences group.

This group performs R&D tasks in the field of Earth System Modelling (ESM) performance: its goal is to identify models bottlenecks and research how to remove them without impacting the final results. The team has at its disposal cutting-edge performance tools, able to evaluate and represent different performance metrics.

The ideal candidate will be responsible for porting Earth Science applications to GPUs. They will also be
responsible for designing and implementing testable and scalable code.

**Key Duties**

- Analyze, port and optimize Earth Science applications to efficiently run on supercomputers based on CPUs and GPUs
- Design highly scalable, testable code
- Use of novel GPU technologies
- Close interaction with external collaborators/software vendors as NVIDIA or AMD

**Requirements**

- **Education**
  - Bachelor's degree or equivalent experience in Computer Science, Engineering, Physics, Mathematics or related field
  - Master’s degree will be valued

- **Essential Knowledge and Professional Experience**
  - Excellent knowledge of CUDA or OpenACC
  - Excellent computing skills in high-level programming languages (especially Fortran or C/C++)
  - Programming skills to manage big and collaborative projects and experience with git
  - Demonstrated experience in GPU porting from CPU codes
  - Demonstrated experience developing and running distributed scientific computing applications with a good understanding of scalability concerns particularly in HPC or cloud environments is an advantage
  - Experience or knowledge in HPC architecture and parallel programming (multi-threaded applications) is an advantage

- **Additional Knowledge and Professional Experience**
  - Fluent in English

- **Competences**
  - Excellent problem-solving skills and a proactive attitude to address new challenges and perfect the current solutions so they gain in reliability and efficiency.
  - Demonstrated learning capacity and motivation to maintain a learning progression during the contract.
  - Good written and verbal skills and the capacity to support Earth and Computational scientists.
  - Team-work
Conditions

- The position will be located at BSC within the Earth Sciences Department
- We offer a full-time contract, a good working environment, a highly stimulating environment with state-of-the-art infrastructure, flexible working hours, extensive training plan, tickets restaurant, private health insurance, fully support to the relocation procedures
- Duration: Open-ended contract due to technical and scientific activities linked to the project and budget duration
- Salary: we offer a competitive salary commensurate with the qualifications and experience of the candidate and according to the cost of living in Barcelona
- Starting date: November

Applications procedure and process

All applications must be made through BSC website and contain:

- A full CV in English including contact details
- A Cover Letter with a statement of interest in English, including two contacts for further references - Applications without this document will not be considered

In accordance with the OTM-R principles, a gender-balanced recruitment panel is formed for every vacancy at the beginning of the process. After reviewing the content of the applications, the panel will start the interviews, with at least one technical and one administrative interview. A profile questionnaire as well as a technical exercise may be required during the process.

The panel will make a final decision and all candidates who had contacts with them will receive a feedback with details on the acceptance or rejection of their profile.

At BSC we are seeking continuous improvement in our recruitment processes, for any suggestions or feedback/complaints about our Recruitment Processes, please contact recruitment [at] bsc [dot] es.

For more information follow this link

Deadline

The vacancy will remain open until suitable candidate has been hired. Applications will be regularly reviewed and potential candidates will be contacted.

OTM-R principles for selection processes

BSC-CNS is committed to the principles of the Code of Conduct for the Recruitment of Researchers of the European Commission and the Open, Transparent and Merit-based Recruitment principles (OTM-R). This is applied for any potential candidate in all our processes, for example by creating gender-balanced recruitment panels and recognizing career breaks etc.
BSC-CNS is an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability or any other basis protected by applicable state or local law.
