Job title: Web developer and Technician (RE2)

About BSC

The Barcelona Supercomputing Center - Centro Nacional de Supercomputación (BSC-CNS) is the leading supercomputing center in Spain. It houses MareNostrum, one of the most powerful supercomputers in Europe, was a founding and hosting member of the former European HPC infrastructure PRACE (Partnership for Advanced Computing in Europe), and is now hosting entity for EuroHPC JU, the Joint Undertaking that leads large-scale investments and HPC provision in Europe. The mission of BSC is to research, develop and manage information technologies in order to facilitate scientific progress. BSC combines HPC service provision and R&D into both computer and computational science (life, earth and engineering sciences) under one roof, and currently has over 900 staff from 55 countries.

Let's stay connected with BSC Folks!

We are particularly interested for this role in the strengths and lived experiences of women and underrepresented groups to help us avoid perpetuating biases and oversights in science and IT research.

Context And Mission

The Language Technologies Unit of the BSC-CNS is funded through the Plan de Impulso de las Tecnologías del Lenguaje de la Agenda Digital by the Secretary of State of Telecommunications and the Information. It is the first publicly-funded text mining unit in Spain and aims to promote the development of natural language processing and machine translation resources for Spanish and other co-official languages in the area of biomedicine.

We are searching for a technician to develop web platforms and associated APIs for the current research
projects in the Language Technologies Unit within the Life Sciences Department.

Key Duties

- Development of front-end platforms and associated APIs for the current research projects in the Life Sciences department.
- Administration tasks on servers, operating systems and applications.
- Server and system backup management.
- Database administration (MySQL, MongoDB).
- Manage virtual machines which act as web servers, control automatic backups and manage users.

Requirements

- Education
  - At least CFGS (higher-education diploma awarded on completion of professional education and training) in web development or equivalent.

- Essential Knowledge and Professional Experience
  - Experience in web frontend technologies and JavaScript ecosystems.
  - Experience managing Unix/Linux systems.
  - Experience in using Git.
  - Experience in microservices software architecture.
  - Experience with back-end frameworks like Spring, Django or Laravel.
  - Experience with front-end frameworks, like Angular, Vue and/or React will be highly appreciated.

- Additional Knowledge and Professional Experience
  - Familiar with software container technologies such as Docker and/or Singularity.
  - Familiar with the design, implementation and deployment of relational databases (MySQL, PostgreSQL or similar) and/or non-relational databases (MongoDB, ElasticSearch, Cassandra).
  - Experience in designing, implementing and documenting data management APIs.
  - Experience with programming languages such as Ruby, Python and/or Java.
  - Experience in developing project technical specifications.
  - Experience in testing applications.
  - Fluent in Spanish and have the capacity to work in English.

- Competences
  - Good communication skills.
Conditions

- The position will be located at BSC within the Life Sciences Department
- We offer a full-time contract (37.5h/week), a good working environment, a highly stimulating environment with state-of-the-art infrastructure, flexible working hours, extensive training plan, restaurant tickets, private health insurance, support to the relocation procedures
- Duration: Open-ended contract due to technical and scientific activities linked to the project and budget duration
- Holidays: 23 paid vacation days plus 24th and 31st of December per our collective agreement
- Salary: we offer a competitive salary commensurate with the qualifications and experience of the candidate and according to the cost of living in Barcelona
- Starting date: 01/02/2024

Applications procedure and process

All applications must be made through BSC website and contain:

- A full CV in English including contact details
- A Cover Letter with a statement of interest in English, including two contacts for further references - Applications without this document will not be considered

In accordance with the OTM-R principles, a gender-balanced recruitment panel is formed for every vacancy at the beginning of the process. After reviewing the content of the applications, the panel will start the interviews, with at least one technical and one administrative interview. A profile questionnaire as well as a technical exercise may be required during the process.

The panel will make a final decision and all candidates who had contacts with them will receive a feedback with details on the acceptance or rejection of their profile.

At BSC we are seeking continuous improvement in our recruitment processes, for any suggestions or feedback/complaints about our Recruitment Processes, please contact recruitment [at] bsc [dot] es.

For more information follow this link

Deadline

The vacancy will remain open until a suitable candidate has been hired. Applications will be regularly reviewed and potential candidates will be contacted.

OTM-R principles for selection processes

BSC-CNS is committed to the principles of the Code of Conduct for the Recruitment of Researchers of the European Commission and the Open, Transparent and Merit-based Recruitment principles (OTM-R). This is applied for any potential candidate in all our processes, for example by creating gender-balanced recruitment panels and recognizing career breaks etc.

BSC-CNS is an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability or any other basis protected by applicable state or local law.
