Job title: Research Engineer / GPU Developer for Earth Sciences applications RE2

About BSC

The Barcelona Supercomputing Center - Centro Nacional de Supercomputación (BSC-CNS) is the leading supercomputing center in Spain. It houses MareNostrum, one of the most powerful supercomputers in Europe, was a founding and hosting member of the former European HPC infrastructure PRACE (Partnership for Advanced Computing in Europe), and is now hosting entity for EuroHPC JU, the Joint Undertaking that leads large-scale investments and HPC provision in Europe. The mission of BSC is to research, develop and manage information technologies in order to facilitate scientific progress. BSC combines HPC service provision and R&D into both computer and computational science (life, earth and engineering sciences) under one roof, and currently has over 900 staff from 55 countries.

We are particularly interested for this role in the strengths and lived experiences of women and underrepresented groups to help us avoid perpetuating biases and oversights in science and IT research.

Context And Mission

The Earth Sciences Department at the Barcelona Supercomputing Center (BSC) (www.bsc.es) is embarking on an umbrella of large-scale activities and developments linked to the implementation of a High-Resolution Emission System for Air Quality Prediction and Greenhouse Gas Monitoring. These activities are part of a large initiative on the “Modernization of observation networks and digitalization of production processes for the development of intelligent meteorological services in the context of climate change” in the framework of the European Recovery, Transformation, and Resilience Plan funded by the European Union-Next
In this ambitious and potentially rewarding endeavor, we need a variety of researchers, and research engineers in computer science. The applicants would ideally have interest in identifying model bottlenecks and research how to remove them, adaptation of parallel codes for accelerators (GPUs).

**Key Duties**

- Porting and optimizing applications to efficiently run on supercomputers based on CPUs and GPUs
- Design highly scalable, testable code
- Use of novel GPU technologies
- Close interaction with external collaborators/software vendors as NVIDIA or AMD

**Requirements**

- Education
  - Bachelor's in Computer Science, Engineering, Mathematics, Physics, or related field.
  - A Master's or PhD is highly valued.

- Essential Knowledge and Professional Experience
  - Computing skills in high-level computer languages (especially FORTRAN or C/C++) and experience with UNIX/LINUX environments and scripting languages (bash, Python, etc)
  - Proficient in managing collaborative projects with Git or similar version control systems.
  - Adherence to coding and documentation best practices and standards.
  - Knowledge of CUDA or OpenACC
  - Experience or knowledge in running and optimizing scientific codes on large HPC systems.
  - Experience in GPU porting from CPU codes
  - Demonstrated experience developing and running distributed scientific computing applications with a good understanding of scalability concerns particularly in HPC or cloud environments is an advantage

- Additional Knowledge and Professional Experience
  - Fluency in English; Spanish language proficiency is optional (free lessons available after joining).

- Competences
  - Strong interpersonal skills to collaborate effectively with a diverse team.
  - Excellent written and verbal communication skills.
  - Ability to take initiative, prioritize tasks, and meet deadlines.
  - Capable of working both independently and collaboratively within a team environment.
Conditions

- The position will be located at BSC within the Earth Sciences Department
- We offer a full-time contract (37.5h/week), a good working environment, a highly stimulating environment with state-of-the-art infrastructure, flexible working hours, extensive training plan, restaurant tickets, private health insurance, support to the relocation procedures
- Duration: Open-ended contract due to technical and scientific activities linked to the project and budget duration
- Holidays: 23 paid vacation days plus 24th and 31st of December per our collective agreement
- Salary: we offer a competitive salary commensurate with the qualifications and experience of the candidate and according to the cost of living in Barcelona
- Starting date: ASAP

Applications procedure and process

All applications must be made through BSC website and contain:

- A full CV in English including contact details
- A Cover Letter with a statement of interest in English, including two contacts for further references - Applications without this document will not be considered

In accordance with the OTM-R principles, a gender-balanced recruitment panel is formed for every vacancy at the beginning of the process. After reviewing the content of the applications, the panel will start the interviews, with at least one technical and one administrative interview. A profile questionnaire as well as a technical exercise may be required during the process.

The panel will make a final decision and all candidates who had contacts with them will receive a feedback with details on the acceptance or rejection of their profile.

At BSC we are seeking continuous improvement in our recruitment processes, for any suggestions or feedback/complaints about our Recruitment Processes, please contact recruitment [at] bsc [dot] es.

For more information follow this link

Deadline

The vacancy will remain open until a suitable candidate has been hired. Applications will be regularly reviewed and potential candidates will be contacted.

OTM-R principles for selection processes

BSC-CNS is committed to the principles of the Code of Conduct for the Recruitment of Researchers of the European Commission and the Open, Transparent and Merit-based Recruitment principles (OTM-R). This is applied for any potential candidate in all our processes, for example by creating gender-balanced recruitment panels and recognizing career breaks etc.
BSC-CNS is an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability or any other basis protected by applicable state or local law.
