

14th RES Users Conference

Objectives

The Spanish Supercomputing Network (RES) annually organizes a user meeting to report on the latest developments in the RES and provide relevant information on access to RES resources and on the European ecosystem in HPC. This conference is a meeting space for all users, support technicians, the access committee and the user committee. The duration of the day will be 2 days, starting on Wednesday, September 16, with plenary sessions and technical and scientific conferences by leading specialists in the area of supercomputing. For the second day, Thursday September 17, the sessions will continue, oriented to scientific topics and technical topics within the HPC world, and a round table discussion on HPC towards society.

Due to the current situation caused by the COVID-19, the 14th RES Users Conference is going to be an online event. This approach will help to develop a more sustainable event and also to avoid possible cancellations due to the threat of the pandemia.
