---

## Improving Performance of All-to-all Communication Through Loop Scheduling in PGAS Environments

**Authors:** [Alvanos, Michail](#) / [Gabriel, Tanase](#) / [Farreras, Montse](#) / [Tiotto, Ettore](#) / [Amaral, José Nelson](#) / [Martorell, Xavier](#)

**Teams:** [Programming Models](#) / [Workflows and Distributed Computing](#) / [Predictable Parallel Computing](#)

**Publication:** 27th International Conference on Supercomputing (ICS)

**Place Published:** Eugene, OR, United States

**Pagination:** 457?458

**Paraules clau:** [one-sided communication](#), [partitioned global address space](#), [performance evaluation](#), [unified parallel c](#)

Barcelona Supercomputing Center - Centro Nacional de Supercomputación
