Programme for the promotion of Women at BSC

BSC have different measures and initiatives to promote women STEM. We are working to improve the 1. numbers of women in science, 2. at the institutional and 3. knowledge level. Our departments carry out different activities and the communication office to recruit more women in science, to empower the brightest minds in higher positions and to make visible the achievements of women scientists.
BSC currently has four initiatives linked to the research departments coordinated by the Equity, Diversity and Inclusion unit. The initiatives collaborate and share experiences of improvement, to promote the actions and measures established in the Gender Equality Plan (2022-2026).
