

[Cis and trans effects differentially contribute to the evolution of promoters and enhancers](#)

URL: <https://genomebiology.biomedcentral.com/articles/10.1186/s13059-020-02110-3>

Authors: [Mattioli, Kaia](#) / [Oliveros, Winona](#) / [Gerhardinger, C](#) / [D, Andergassen](#) / [PG, Maass](#) / [Rinn, John](#) / [Melé, Marta](#)

Publication: Genome Biology

Volume / Number: 21 / 210

Paraules clau: [Cis and trans effects](#), [Gene expression evolution](#), [Massively parallel reporter assays](#), [Regulatory element evolution](#)
