Constant-Time Sliding Window Framework with Reduced Memory Footprint and Efficient Bulk Evictions

URL: https://ieeexplore.ieee.org/document/8456588/

Authors: Navarro, Villalba / Berral, J. / Carrera, D.

Publication: IEEE Transactions on Parallel and Distributed Systems

Paraules clau: Microsoft Windows, Data structures, data analysis, Computational efficiency, Time complexity, Real-time systems, Internet-of-things, data analytics, Big Data, Stream Processing, real-time
