

## Sequence-to-sequence models for workload interference prediction on batch processing datacenters

**URL:** <https://doi.org/10.1016/j.future.2020.03.058>

**Authors:** [Buchaca, David](#) / [Marcual, Joan](#) / [Berral, Josep Lluís](#) / [Carrera, David](#)

**Research Lines:** [Applied Learning Methods](#) / [Big Data Frameworks](#) / [Data-Center Optimization](#)

**Publication:** Future Generation Computer Systems

**Place Published:** Elsevier

**Volume / Pagination:** 110 / 115-166

**Paraules clau:** [deep learning](#), [Resource management](#), [Sequence-to-sequence](#), [Workload interference](#), [Workload placement](#)
