Inicio > BSC Training Course: Introduction to Heterogeneous Memory Usage

BSC Training Course: Introduction to Heterogeneous Memory Usage

Objectives

The objective of this course is to learn how to use systems with more than one memory subsystem. We will see the different options on using systems equipped with Intel's Optane Persistent Memory technology, but also looking forward to upcoming systems with HBM and CXL memories.
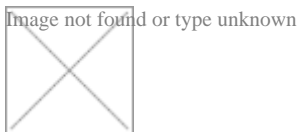

Requirements
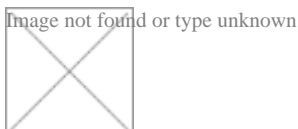

Basic skills in C programming.

Learning Outcomes

The students who finish this course will able to leverage applications using multiple memory subsystems.
