

Data Visualization, the theme of the next Severo Ochoa café

At the next **SO café** some of our fellows will help us to understand the basic elements of **data visualization**: general and commons techniques and tools used for visualize complex data sets, data correlations and simulations.

Even it is not the easiest topic to summarize in half an hour, it's been considered that also a short overture

will be very interesting for everybody. The group should be composed by: *Toni Artigues*, *Matias Ribero* and whoever wants to help into animating the presentation

See you tomorrow, 14.15 in the large meeting room of Torre Girona.

The meeting is open to all the (young) staff working within the SO project.

Barcelona Supercomputing Center - Centro Nacional de Supercomputación
