

## [BSC Earth Sciences Open Day](#)

Discover the work done by women and dissident identities in earth sciences and visit the Barcelona Supercomputing Center (BSC) facilities, including MareNostrum 5, the most powerful supercomputer in Spain.

Through informal short talks, you will establish a link with researchers at various professional career stages in the areas of atmospheric composition, climate variability and change, health resilience, computational Earth sciences and Earth system related services.

- **Activities:** Overview of the BSC Earth Sciences Department, short talks with earth scientists, networking with pica-pica, and visit to the MareNostrum 5.
- **Aimed to:** Master and last year Bachelor students interested in Earth sciences. Limited places (maximum 30 people)
- **Date:** 10 November 2023, 2023, 11 a.m. - 1:30 p.m.
- **Venue:** BSC, Plaça d'Eusebi Güell 1-3, Barcelona

Language: English, Spanish or Catalan (depending on the audience and the speaker)

More information: [equity4es@bsc.es](mailto:equity4es@bsc.es)-

This activity is organised as part of the Equity for Earth Sciences programme activities.
