

## HPC Code Review Club @BSC

### Objectives

Peer code review is a good practice in code development. Here at BSC, each department creates some code to run jobs in a High-Performance Computing (HPC) setting. The HPC code review club will meet monthly to review HPC related code created at BSC. In each meeting, someone from one of the departments will present a code connected to a project. The presentation and conversation will include a description of the application and how it works, nodes being used, how the code is measured for optimization, and questions the person or team might have on what approach to follow or how to improve their code.

### Speakers

Mario Acosta and Miguel Castrillo (Earth Sciences)  
Barcelona Supercomputing Center - Centro Nacional de Supercomputación
