Nitric oxide reactivity with globins as investigated through computer simulation.

Authors: [Marti, Marcelo](#) / [Capece, Luciana](#) / [Bidon-Chanal, Axel](#) / [Crespo, Alejandro](#) / [Guallar, Victor](#) / [Luque, Francisco Javier](#) / [Estrin, Darío](#)

Publication: Methods in enzymology

Volume / Pagination: 437 / 477-98

Palabras clave: [Biomechanics](#), [Computer Simulation](#), [Energy Metabolism](#), [Globins](#), [Heme](#), [Kinetics](#), [Metabolic Detoxication](#), [Drug](#), [Models](#), [Molecular](#), [Models](#), [Theoretical](#), [Mycobacterium tuberculosis](#), [Myoglobin](#), [Nitric Oxide](#), [Oxygen](#), [Protein Binding](#), [Protein Folding](#), [Quantum Theory](#), [Signal Transduction](#), [Substrate Specificity](#), [Truncated Hemoglobins](#)
