CUDA and OpenACC Training
BSC, in association with Universitat Politècnica de Catalunya (UPC) was designated by NVIDIA as a GPU Center of Excellence (GCOE) in 2011 in recognition of their role as leading institutions at the forefront of parallel computing research.

Together, BSC and UPC have built an Education Programme on Parallel Programming using CUDA and OpenACC in order to train experts in the use and development of parallel systems. This includes the design and implementation of a small GPU cluster prototype system to explore the potential of low-power GPU clusters as High Performance Computing platforms.
