Access to RES

The Spanish Supercomputing Network (Red Española de Supercomputación, RES) is a distributed infrastructure of 12 supercomputers. RES resources are available to researchers from Spanish public R&D institutions through competitive activity calls.

Please, visit RES website to obtain more information about how to apply for RES resources. Your can also access to RES intranet to obtain further information about the access protocol. On this portal you will be able to create an account as a RES user, apply for RES resources and manage your current activities.

Access to RES Intranet
