Collaboration with Companies

Increasing emphasis is being placed by BSC-CNS management on encouraging and facilitating interactions with industry at all levels, from direct R&D collaborations, to educational activities, such as providing technical seminars, and staff exchanges with private industry R&D laboratories.

This objective is achieved by means of:

- Collaboration with the private sector to promote the use of supercomputing as a tool for innovation and competitiveness
- Transferring cutting-edge supercomputing technologies to society
- Disseminating the benefits of supercomputing for companies and society
- Ensuring the efficient management of public supercomputing resources
