Spin-Offs and Entrepreneurship

Spin-Offs

For BSC Spin-offs are a fundamental tool in the Technology Transfer towards the market. The Technology
Transfer Office at BSC provides support to the researchers in the creation of their spin-offs and participates actively in the process providing information, training and being the hub with the entrepreneurial ecosystem.

**Innovation Journey**

Innovation Journey

BSC fosters the exchange of knowledge and expertise between academia and private enterprise to maximize our research potential by transforming academic potential into practical applications. *Innovation Journey* exposes entrepreneurial researchers to new opportunities that exist for their projects with the overarching goal of broadening the impact of the new technologies into the market. The program will simulate in 6 sessions the real journey when licensing technologies and/or creating a company out of an idea to develop a full understanding about the entrepreneurial path.
