2019

- **Probabilistic Worst-Case Timing Analysis**
  ACM Computing Surveys

- **NoCo: ILP-Based Worst-Case Contention Estimation for Mesh Real-Time Manycores**
  2018 IEEE Real-Time Systems Symposium (RTSS)
  Cardona, J., C. Hernandez, E. Mezzetti, J. Abella, and F. J. Cazorla

- **Towards limiting the impact of timing anomalies in complex real-time processors**
  Proceedings of the 24th Asia and South Pacific Design Automation Conference on - ASPDAC '19
  Benedicte, P., J. Abella, C. Hernandez, E. Mezzetti, and F. J. Cazorla

- **Probabilistic Worst-Case Timing Analysis**
  ACM Computing Surveys

- **Time-Randomized Wormhole NoCs for Critical Applications**
  ACM Journal on Emerging Technologies in Computing Systems
  Sljepcevic, M., C. Hernandez, J. Abella, and F. J. Cazorla

- **Towards limiting the impact of timing anomalies in complex real-time processors**
  Proceedings of the 24th Asia and South Pacific Design Automation Conference on - ASPDAC '19
  Benedicte, P., J. Abella, C. Hernandez, E. Mezzetti, and F. J. Cazorla

- **Increasing the Reliability of Software Timing Analysis for Cache-Based Processors**
  IEEE Transactions on Computers
  Milutinovic, S., E. Mezzetti, J. Abella, and F. J. Cazorla

2018

- **RPR: a random replacement policy with limited pathological replacements**
  Proceedings of the 33rd Annual ACM Symposium on Applied Computing - SAC '18
  Benedicte, P., C. Hernandez, J. Abella, and F. J. Cazorla

Consumer Electronics Processors for Critical Real-Time Systems: a (Failed) Practical Experience
Fernandez, G., F. Cazorla, and J. Abella
